AYAZ S1P

# BESTGUARD AYZAZ S1P

## Features

These work shoes are made with a breathable upper of 1.8- 2 mm micro- fiber, which allows the foot to breathe comfortably. The upper part, designed with a knitting system, has an anti-odor and sweat-absorbing textile lining, which provides comfort for long-term use. Additionally, it provides a hygienic environment thanks to its removable and washable surface. The sole, produced using the double density injection method, provides extra durability and offers a safe working environment with its antistatic feature. Additionally, the composite toe cap and kevlar midsole increase compliance with safety standards. These work shoes have **A E FO SR WPA PL** markings and are an option suitable for long-term use with their ergonomic design and comfortable structure.

**EN ISO 20345:2022**
